

DAL SAPERE AL SAPER FARE

Basic Course of Italian School Intraoral Welding Technique.

Duration: one day, from 10.30 to 18.00.

General Description

Concepts and fundamentals of Italian immediate loading dental implantology:

- Disparallelism, bicorticalism, bracing
- Bracing advantages: The welder
- Introduction
- SincrySTALLIZATION
- Physics and basic notions
- Quality of weld
- Passivation maneuvers of wire
- Wire positioning
- Number of usable wires
- Bracing by welding titanium wires to implants
- Prosthetic protocols
- Preparation
- Mounting of temporary prosthesis
- Permanent preparation
- Wire destination
- Impression
- Hygienic prosthesis versus aesthetic prosthesis
- Video of a demonstration surgery: a basic implantology surgery will be demonstrated with the final application of the welded wire.
- Intraoral welder
- Practice of immediate bracing by using titanium wires
